

Street Sweeping

Streets are swept five days a week in the business districts. Street sweeping is performed on a once-a-week schedule in the residential district, interrupted only by the mammoth task of leaf collection (roughly from October 1st through mid-December). During the leaf pickup period residential streets are swept on a schedule that is dictated by the accumulation of leaves.

The effectiveness of the street sweeping program depends solely upon the cooperation of the residents; the sweeping machines cannot get to curbside if cars are parked in the street on sweeping day. To do your part, make certain your cars are off the street on street sweeping day, which is determined by where you live as noted in the following schedule:

Monday:

South of Route 4 and west of the railroad, south of Cedar Lane and west of Queen

Tuesday:

East of Queen Anne Road and south of Cedar

Wednesday:

East of the railroad, north of Cedar Lane to Genessee Avenue / Bogert Street / West

Thursday:

North of Genessee Avenue / Bogert Street / West Englewood Avenue to the Bergenfield line

Friday:

North of Route 4 and west of the railroad, south

NOTE:

If you live on the street which is a boundary line between districts, imagine that
